

Impact Resistant Fabric Shutters

The easy way to protect your home from a storm

FOR REPLACEMENT AND NEW CONSTRUCTION APPLICATIONS

Impact Resistant Fabric Shutters

Impact Resistant Fabric Shutters are engineered to protect your home against dangerous weather, including hurricane force winds. These one piece, waterproof fabric shutters reduce the likelihood of flying debris and water penetrating the window opening. This results in a dramatic reduction in structural and/or water damage to your home.

Advanced Fiber Technology

All the features and benefits you want without all the concerns associated with wood or metal shutters. These impact resistant fabric shutters feature an extreme strength to weight ratio for maximum protection, yet they allow light in while keeping debris and rain out.

Easy to Install

A simple attachment system results in fast, easy installation. No special tools or training is required to install fabric shutters. Just fit the grommets over the anchors and fasten with wing nuts. And when the storm is over, it's just as easy to remove the shutters, fold or roll them up and store them until the next time you need them.

Custom Made For all of your windows and doors regardless of shape or size

Quick and Easy Application No special tools required

Easy to Handle and Store Roll them, fold them, or hang them up until the next storm

Effective Alternative The fabric lets light in unlike unsightly metal or wood coverings

Safe and Easy to Use Lightweight, no sharp edges, easy to clean, mildew and corrosion resistant

Attractive, Affordable Option A genuine value for your home at a very affordable cost

Design Pressure +75/-75 PSF

Warranty Impact Resistant Fabric Shutters feature a 10-Year Warranty

Impact Resistant Fabric Shutters The Easy Choice
